This Dossier Is Issued by the

as part of its campaign to rid the schools and colleges of  
Socialistic, un-American teachings and teachers.

### PART I

NOTE: In order to fully understand this report and the reasons for its inclusions and omissions, it is essential to read these first three pages.

The accompanying tabulation lists 100 faculty members of nine leading women's colleges and the documented record of their affiliations with Communist fronts.

All the organizations and enterprises cited herein are Communist or Communist fronts. Most of them have been officially designated as such by one or more government agencies or investigating committees (see Part II for details on such designation). In general, those which have not been officially designated are local organizations, or are so new that no official agency has had a chance to report on them as yet. They, however, follow the usual Communist line, have been enthusiastically promoted by the Daily Worker, and have had the chronic fellow travelers as members.

The seriousness of Communist-front affiliations is not to be measured solely in quantitative terms - some Communist fronts have been more obviously subversive than others. The dates also should be taken into consideration; affiliation with Communist-front organizations since 1947 has a significance which would not necessarily attach to such association in 1933 or '34, for the reason that each passing year has added to public understanding of the sinister character of such organizations.

It is not to be assumed that because a professor or instructor is included in this list it is conclusive evidence that he or she is a Communist. He may be simply naive. This dossier merely states the fact of the affiliation. Obviously we cannot know the reason for such affiliation or the purpose behind it.

Similarly, this list does not include all those members of the respective faculties who may be pro-Communist. Some of the most subversive and dangerous persons in America and many other pro-Communists have never been on any Communist front. In some cases they are secret members of the Communist Party - often high in its councils - and for strategic reasons have no outward connection with the party or any of its affiliates. In other cases, they may be intensely pro-Communist but have not been of sufficient importance to be asked to serve on a front organization; in general those asked to serve were those whose names carried some weight.

This report does not include the names of other members of the various faculties who may believe in or advocate Communism, Socialism, collectivism and planned economy, or those who sneer at capitalism, or are opposed to the American system of freedom and free enterprise. THIS DOSSIER INCLUDES ONLY THE NAMES OF PERSONS WHO HAVE BEEN AFFILIATED WITH COMMUNIST OR COMMUNIST-FRONT ACTIVITIES.

The greatest indictment against the professorial fellow travelers of the Communists is that they lend an air of harmlessness, even respectability, to the vicious, debased movement that is Communism.

Owing to frequent changes of university personnel, the listed title or subject taught may not be currently correct. They are correct, however, as of press date, November 1, 1951, in accordance with the latest catalog of the various colleges:

Bennington - July 1950	Sarah Lawrence - August 1951
Bryn Mawr - April 1950	Skidmore - April 1951
Connecticut - March 30, 1951	Smith - March 1951
Mount Holyoke - January 1951	Vassar - October 1950
Wellesley - October 20, 1951	

The only exception to this is in the inclusion herein of Marion Hathway, a notorious Communist-fronter who, according to newspaper accounts, was appointed to the faculty of Bryn Mawr for the year commencing September 1951.

Also, some professors are not at present connected with the organizations listed. In fact, certain of the organizations were of a temporary nature, created for a specific purpose, and are no longer in existence. In each case, however,

documentary proof is available as to the affiliation at the time.

Some of the names listed herein are now professors "emeritus." In some instances, these were active professors at the dates of their association with the Communist fronts. In any case, however, they are still carried in the catalog and are using or have used the prestige of their college to aid Communists in their avowed program to destroy America.

It doubtless will be contended that professors have a right to join any organization they wish. This is certainly their right. But the trustees, alumni, contributors, students and the parents of students have a right to know with which un-American organizations their instructors have been affiliated. Also, if graduates and donors feel that because of such participation the professor or the school is not a fit one to support, or parents feel that the college is not a proper one to have their children attend, it is their right to take steps to remedy the situation.
